Configuring Print Settings

Each report may have specific print related settings, such as number of copies, printer type and print on a specific printer only etc. To achieve this, you can setup a print setting and associate it with reports. This way, you can reduce repetitive work of providing print options each time you are printing a report.

To create multiple print settings, go to **Print Settings** page. Click Navigation > Administration > Configure > Print Settings.

Note: If Intellicus is running under security disabled, specify following URL in the browser's address bar to get this page.

If you are using the computer used as web server,

<http://localhost/intellicus/pattern/conf> and then click Print Settings tab.

In other cases,

<http://<IP of the server>/Intellicus/pattern/conf> and then click Print Settings tab.

Entry details

Administration > Configure > Print Settings	
Databases Server Client Viewer Adhoc Wizard Portal Menu Print Settings License Config Files	
Save Cancel	
Print Setting Name List	Print Setting Properties
BatchSchedulePrinter	Print Setting Name: BatchSchedulePrinter
DetailedReps	Printer: HP LaserJet 4050 Series PS
SmallReps	When Printer not found: Popup Printer Dialog
	Printer Type: Laser
	Copies: 1
	Paper Tray: Default Tray
	Is Forceful: <input type="checkbox"/>

Figure 1: Configuring Print settings

- **Print Setting Name:** A unique name to identify this setting.
- **Printer:** Select the printer on which report having this setting should be printed.

-
- **When Printer not found:** From the dropdown box, select the action to be taken when selected printer is not found.
 - **Printer Type:** Select the most suitable type for the selected printer. DMP stands for dot matrix printer.
 - **Copies:** Specify the number of copies (1 to 99) to be printed.
 - **Paper tray:** The paper tray of the printer to be used.
 - **Is Forceful:** Select this check box if report should use only *this setting*. If this check-box is not selected, while report printing, this setting will appear as "default" setting and you will be able select any of the other settings too. This can be quite useful to restrict printing of reports having sensitive / classified information.

Adding a Print Setup

1. Click **Add** Button.
2. In **Print Setting Name**, specify a unique name to identify this setting.
3. Specify details in respective entry boxes.
4. Click **Save** button.

The print setup is added in the list appearing on the left side of the page.

Changing a Print Setup

1. From the **Print Setting Name** list, click the name of the setting that is being changed.
2. Click **Modify** button. The details appear in respective entry boxes.
3. Make changes wherever required.
4. Click **Save** to save the changes.

Deleting a Print Setup

1. From the **Print Setting Name** list, click the name of the setting that is being deleted. The details appear in respective entry boxes.
2. Click **Delete** button. To proceed with deletion, click **OK** on the confirm dialog box.
