Applying Intellicus License

All the tasks related to licensing can be done on **License** tab of **Configuration** page.

Click Navigation > Administration > Configure > License to open **License** tab.

The **Report Server Licensing** area details current licensing details.

The screenshot shows a web interface with a breadcrumb trail 'Administration > Configure > License' and a navigation menu with tabs: Databases, Server, Client, Viewer, Adhoc Wizard, Portal Menu, Print Settings, and License. The 'License' tab is active. Below the menu is a table titled 'Report Server Licensing' with two columns: a property name and its value.

Report Server Licensing	
ADHocPowerViewer	Yes
APIDes	Yes
AdhocWiz	Yes
AsyncExec	
AuditLog	Yes

Generating License request file

In order to get a license, you need to mail this License Request File to your vendor for processing. The vendor will send you a License file. The License file needs to be deployed to make it effective.

Deploying a License

As stated above, once you receive the License file from your vendor, you need to deploy the license. This process is carried out on **License** tab of Report Server **Configuration page**.

To deploy a license,

1. In **Select new license file** entry box, you need to specify path along with name of the new license file that you have received from your vendor. Click **Browse** button to locate and select the file.
2. Click **Deploy License** button to deploy the newly received license.

A message "Information saved successfully" shall be displayed.

After deploying the license it is suggested to restart the Report Server and Web Server for the new license to come into effect.

Studio Licensing

Desktop Studio

For Intellicus Desktop Studio, User Based licensing and Seat Based licensing is available.

User Based licensing for Desktop Studio

In **Desktop Studio** header and within **User Based** area,

1. From **Organization** dropdown box, select the organization to which the user belongs. **Designer Users** list includes all the users of selected organization who are given *Standard Report Designer* access privileges.
2. To allocate a user license, select the user and shift it to **Allocated Users** list by clicking arrow button. User will appear in **Allocated Users** list.
3. Click **Save** button.

Seat Based licensing for Desktop Studio

In **Desktop Studio** header and within **Seat Based** area,

1. From **Organization** dropdown box, select the organization to which the user belongs. **Designer Users** list includes all the users of selected organization who are given *Standard Report Designer* access privileges.
2. To allocate a user license, select the user and shift it to **Allocated Users** list by clicking arrow button. User will appear in **Allocated Users** list.
3. Click **Save** button.

Web Studio

User based licensing is available for Web Studio. Users who will be designing reports using Intellicus Web Studio are allocated licenses. In **Web Studio** area,

1. From **Organization** dropdown box, select the organization to which the user belongs. **Designer Users** list includes all the users of selected organization who are given *Standard Report Designer* access privileges.
2. To allocate a user license, select the user and shift it to **Allocated Users** list by clicking arrow button. User will appear in **Allocated Users** list.
3. Click **Save** button.
