## Applying Intellicus License

All the tasks related to licensing can be done on **License** tab of **Configuration** page.

Click Navigation > Administration > Configure > License to open **License** tab.

The **Report Server Licensing** area details current licensing details.

Figure 1: License tab of Report Server Configuration page

### Generating License request file

In order to get a license, you need to mail this License request file to your vendor for processing. Click the **Generate** button in order to get this License request file.

The vendor will then send you a License file. The License file needs to be deployed to make it effective.

<b>Generate</b>	License request file(you need to send this content to your vendor for receiving license)
<b>Change Report Server License</b>	
Select new license file	<input type="text"/>
<b>Browse</b>	<b>Deploy license</b>

Figure 2: Generating License Request file and Deploying License

## Deploying a License

As stated above, once you receive the License file from your vendor, you need to deploy the license. This process is carried out on **License** tab of Report Server **Configuration page**.

To deploy a license,

1. In **Select new license file** entry box, you need to specify path along with name of the new license file that you have received from your vendor. Click **Browse** button to locate and select the file.
2. Click **Deploy license** button to deploy the newly received license.

A message "Information saved successfully" shall be displayed.

Apart from above, you can also manually deploy license by copying the same at the following location:

<Installed Location>\Intellicus\ReportEngine\bin

After deploying the license it is suggested to restart the Report Server and Web Server for the new license to come into effect (mandatory in case of manually deployed license).

**Note:** The name of the license file should be 'ReportEngine.lic' at the time of deploying license.
