Start Intellicus

You can follow the below mentioned steps to start the Report Server and Web Server:

To Start the Report Server and Web Server

Intellicus provides a script (intellicus.sh) which is responsible to launch, stop & monitor the application. This script is located at /Applications/Intellicus.

It expects a user input to perform the appropriate action
- start : to start the report server and web server
- stop : to stop the report server and web server
- status : to provide the status of report server and web server

1. To launch the application run the **intellicus.sh** script file with **start** as user input

```
./intellicus.sh start
```

It will launch the Intellicus report server and web server.

2. To monitor the application run the **intellicus.sh** script file with **status** as user input

```
./intellicus.sh status
```

It will return the status of Intellicus report server and web server.

To Start the Report Server Only

Intellicus provides a script (reportserver.sh) which is responsible to launch, stop & monitor the Intellicus report server. This script is located at /Applications/Intellicus.

It expects a user input to perform the appropriate action
- start : to start the report server
- stop : to stop the report server
- status : to provide the status of report server

1. To launch the report server run the **reportserver.sh** script file with **start** as user input

```
./reportserver.sh start
```

2. To monitor the report server run the **reportserver.sh** script file with **status** as user input

```
./reportserver.sh status
```

You can also follow the below mentioned steps to start the Report Server:

To start the Report Server, run the file 'run.sh' located in the '/Applications/Intellicus/reportengine/bin' folder.

```
./run.sh
```

To Start Intellicus Web Server Only

You can follow the below mentioned steps to start the Web Server only:

Intellicus provide a script (webserver.sh) which is responsible to launch, stop & monitor the Intellicus web server. This script is located at /Applications/Intellicus.

It expects a user input to perform the appropriate action
- start : to start the web server
- stop : to stop the web server
- status : to provide the status of web server

1. To launch the web server run the **webserver.sh** script file with **start** as user input

```
./webserver.sh start
```

2. To monitor the web server run the **webserver.sh** script file with **status** as user input

```
./webserver.sh status
```

You can also follow the below mentioned steps to start the Web Server only:

To start the Intellicus Web server, run the file 'startup.sh' located in the '/Applications/Intellicus/jakarta/bin' folder.

```
./startup.sh
```

To Start Intellicus Web Reporting suite

1. Open the browser.
2. In address bar, specify the following URL:

```
http://<IP of the webserver>/intellicus
```

For example, http://120.98.99.256/intellicus

If user has changed the Webserver port, specify the following URL:

```
http://<IP of the webserver:port number>/intellicus
```

For example, if the changed port number is 7000, the URL would be:

```
http://120.98.99.256:7000/intellicus
```

Logging into Intellicus Web reporting suite

User needs to provide following information to log into Intellicus.

- User Name: Admin

- Password: Admin

- Organization Name: Intellica

Click **Login** after entering the required information.

Stop Intellicus

To Stop the Report Server and Intellicus Web Server

You can follow the below mentioned steps to stop the Report Server and Web Server:

To stop the application run the **intellicus.sh** script file with **stop** as user input. This file is available in /Applications/Intellicus folder.

```
./intellicus.sh stop
```

It will stop the Intellicus report engine and web server.

To Stop the Report Server

To stop the report server run the reportserver.sh script file with stop as user input. This file is available in /Applications/Intellicus folder.

```
./reportserver.sh stop
```

You can also follow the below mentioned steps to stop the Report Server:

Run the file shutdown.sh. This file is available in /Applications/Intellicus/reportengine/bin folder.

```
./shutdown.sh
```

To Stop the Web Server

To stop the web server run the webserver.sh script file with stop as user input. This file is available in /Applications/Intellicus folder.

```
./webserver.sh stop
```

You can also follow the below mentioned steps to stop the Web Server:

Run the file shutdown.sh. This file is located in the /Applications/Intellicus/jakarta/bin folder.

```
./shutdown.sh
```

Uninstall Intellicus

You need to stop the Report Server and Web Server as explained in the previous section.

To uninstall, delete the /Applications/Intellicus folder under the installed disk drive.
