

Configuring Adhoc Report

About the course

The Intellicus Reporting Suite has various tools specially designed for optimizing the resources.

In this course you can learn to design report objects and prepare a semantic meta-layer for your business users to create or modify your own ad hoc reports. You can also learn to create connections and parameter objects.

You can also learn to customize available templates to view ad hoc reports.

Course Prerequisites

- ✓ Knowledge of Windows and Web browser usage.
- ✓ Business User View

Learning Objective

- ✓ Query Objects - Create query object, look up values, hyperlinks
- ✓ Creating connection
- ✓ Setting the Pool settings for connection
- ✓ Parameter objects – Char, Boolean, Date and Number
- ✓ Adhoc Configuration

Benefits derived

- ✓ Optimize the utilization of connections.
- ✓ Reduces the rework of creating and using query or parameters
- ✓ Can customize the templates to change the look and feel to match your business needs
